

GRAPHIC ERA HILL UNIVERSITY, DEHRADUN

Profiling Sheet

Q.1: Write your career objective.

My career objective is to become a skilled software engineer who can design & develop efficient, reliable, and user-friendly technology solutions to solve real-world problems.

Q.2: Why do you want to be an engineer? Elaborate reasons.

I want to be an engineer because engineering allows me to convert ideas into practical solutions using logic, creativity & technology. I enjoy problem-solving & analytical thinking, and engineering gives me a platform to build systems that can make life easier & efficient.

Q.3: Write about projects or internship you have done/ are doing along with the learning.

I have worked on academic projects such as a Java-based desktop application and DSA problem solving projects. Through these projects, I learned core Java concepts, OOPS, file handling, basic algorithms & logical thinking. I also learned teamwork, time management, & debugging skills while working on these projects.

Q.4: What would you consider a significant achievement in your life and why?

One of the significant achievements is consistently improving my technical skills by completing projects and practicing coding regularly. It is important to me because it reflects my discipline, dedication, and ability to learn independently despite challenges.

Q.5: Write about a failure of yours which you consider to share. What have you learned from it?

Initially, I struggled with managing time between academics and learning new technical skills, which affected my performance. From this failure, I learned the importance of proper planning, setting priorities, & maintaining consistency to improve overall productivity.

Q.6: What are your strengths? Write one or two instances where you have demonstrated your strengths.

My strengths include problem solving, adaptability and dedication. I demonstrated these strengths while working on technical projects where I faced errors & challenges but solved them by researching, practising, and seeking guidance when required.

Q.7: Write about your weaknesses. What are you doing to overcome your weaknesses?

One of my weakness is overthinking while solving complex problems. To overcome this, I am practicing structured problem-solving, improving my confidence, and breaking problems into smaller steps for better clarity.

Q.8: What is the most difficult moment that you have faced in your life so far? What qualities helped you to overcome the moment?

Managing academic pressure along with self-learning technical skills was one of the most difficult moments. My patience, perseverance, and willingness to learn helped me overcome this phase and improve steadily.

Q.9: Apart from academics, what else are you interested in?

Make a separate list in terms of extracurricular activities, sports and any other interests.

Extracurricular Activities :-

• Coding Practice & Exploring new technologies.

Sports :- Badminton, chess / fitness activities

Other Interests :-

→ Listening to music & podcasts.

→ Cooking.

Q.10: Give an example of an area, concept or thing that you are absolutely passionate about.

I am absolutely passionate about software development & problem solving, especially using C++, Java & Data Structures, as it allows me to create logical and efficient solutions.

Q.11: Describe yourself as an individual in 5 lines.

I am motivated, positive & disciplined student.
I believe in practical learning & teamwork.
I am adaptable to new environment & challenges.
I enjoy learning new skills & improving myself.
I always strive to give my best effort.

Q.12: What kinds of people do you enjoy working with?

I enjoy working with people who are positive, collaborative, responsible, disciplined & willing to share knowledge. Such people motivate me to learn & perform better.

Q.13: What kinds of people you don't want to work with?

What would you do if they became your senior in your dream job?

I find it difficult to work with people who are negative or unwilling to cooperate. If such a person became my senior, I would remain professional, respect their position, and focus on learning while maintaining a positive attitude.

Q.14: What do you expect from your first job? Prioritize and write in order.

- 1) learning and skill development
- 2) fair and competitive salary
- 3) Practical exposure to real projects
- 4) professional work environment
- 5) Good mentorship & guidance
- 6) Career growth opportunities.

Q.15: In the past year, what have you been dissatisfied about in your performance?

I was dissatisfied with not being consistent enough in practicing coding initially. However, I recognized this and worked towards improving my regular practice and discipline.

Q.16: Rate yourself out of 5 in verbal communication. What are you doing to improve your communication skills?

I would rate myself 3.5 out of 5. I am improving my communication skills by participating in discussions, practicing presentation, and interacting more confidently with peers.

Q.17: Who is your role model? What qualities of that person you would like to see in your personality and why?

My role model is Dr. A.P.J. Abdul Kalam.
I admire his dedication, humility, discipline,
& passion for learning. I want to develop
his qualities of perseverance & commitment
toward personal & professional growth.

Q.18: Write a few lines about your friends. Do you think they help/ may help you in achieving your goals? If yes, how? If no, why do you accompany them?

My friends are supportive and motivating.
They help me by sharing knowledge,
encouraging me during challenges, and
creating a positive learning environment
which supports my goals.

Q.19: Write 3 leadership qualities. How many do you possess? Write an instance where you have applied those qualities.

Three leadership qualities are:- Communication,
responsibility, & decision-making. I believe I
possess two of them - responsibility and
communication. I applied these qualities while
coordinating with teammates during project
work and ensuring tasks were completed on time.

Q.20: So finally, tell us something more about yourself or introduce yourself.

I am a dedicated technology student with a strong interest in software development & problem solving. I believe in continuous learning, discipline, & self improvement. I am eager to gain industry exposure and apply my technical knowledge to build meaningful solutions while growing professionally.
